About the Conference-ICRESET

International Conference on Recent Explorations in Science, Engineering and Technology aims to bring together the leading academicians, scientists, research scholars and industry professionals to exchange their experiences and research results on all aspects of engineering and technology. We solicit both academic research and industrial contributions.

We welcome technical papers presenting research and experimental results, position papers addressing the pros and cons of specific proposals, such as those being discussed in the standards for industry consortia and survey papers addressing the key problems and solutions on any of the tracks listed or research papers on which work is in progress. Submitted conference papers will be reviewed by technical committee of the conference and recommended for publication in the conference proceeding with ISBN and also selected papers will be recommended for publication in the reputed UGC and Scopus indexed journals.

The conference will also be having digital track in the form of webinar presentation helping few authors to get connected to audience through ICT mode mainly on Skype.
